

# Crown Adapters

**DESCRIPTION**

You are considering changing over to a modular synthetic screen media system but worry that there will be instances when you will need to change the opening size to make a different product spec. Therefore, you just won't back yourself into a corner by investing in a new frame system that could not economically respond to special product requests.

**BENEFITS**

Our crown adapters offer a simple and economical option when you have an existing Polydeck frame system installed but need to make a short run of a different product spec using wire cloth. By removing the Polydeck modular screen panels and installing crown adapters on your PipeTop II™ frame, you can install wire cloth, complete the custom product run and reverse the process to re-install the modular screen panels. Polydeck crown adapters and our PipeTop II™ frame system provide the ultimate in flexibility and versatility in the screen media industry.

**OPTIONS**

Crown adapters are made of our abrasion-resistant polyurethane compound and are available for both pin-style and PolySnap® PipeTop II™ fastening systems.

The pin-style option is available in 13 crown heights:

- 1/2"                      - 1-3/8"
- 5/8"                      - 1-1/2"
- 3/4"                      - 1-5/8"
- 7/8"                      - 1-3/4"
- 1"                         - 2"
- 1-1/8"                  - 2-1/4"
- 1-1/4"

The PolySnap® option is available in 9 crown heights:

- 1"                         - 1-5/8"
- 1-1/8"                  - 1-3/4"
- 1-1/4"                  - 2"
- 1-3/8"                  - 2-1/4"
- 1-1/2"
